

OPEN/DB-Jacana-Valet

Powerful Data Access and Reporting for iSeries users

ROI

Report development costs and ongoing maintenance are slashed no programming or SQL skills needed

Tackles Backlogs

Reporting backlogs melt away - product or transaction listings, to executive decision making overviews to marketing, finance and regulatory reporting

User Friendly

User and IS tool - for simple and advanced reporting.... ideal for ad-hoc reporting requests

Productivity

Produces new reporting fast - enabling business reporting outputs to adapt to change. More efficient use of IS and business user resources

Flexibility

Addresses different output requirements:

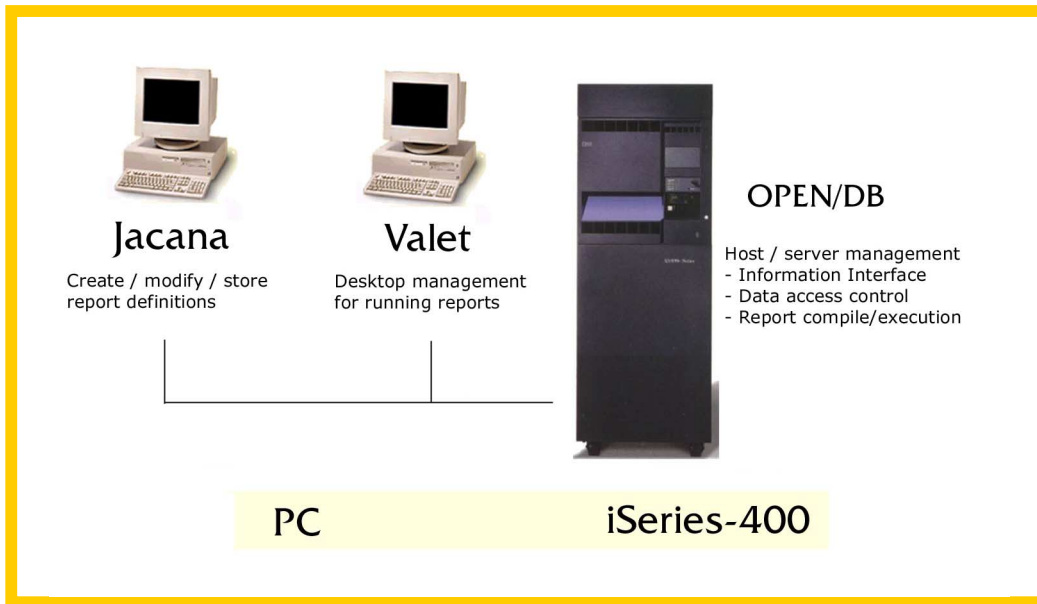

- detailed, summary, matrix reporting
- printed, PC applications file, iSeries-400 file
- HTML - XML - PDF

Security

Comprehensive security to field level combined with audit logging to address HIPAA requirements

"I think the most obvious benefit for us is the greatly reduced turn-around time in getting reports designed and generated. We know the information we want, and now we know where it is, and how to make best use of it."

Sandie Motkowski - Human Resources Coordinator at Brown County, USA.

OPEN/DB (for security, data access and operational control)

Unique Information Interface enables presentation of databases in a meaningful way

Detailed, summary, matrix reporting
