

# Jacana inTuator

*information analysis at your fingertips*

**Jacana inTuator** ... the fresh and amazingly simple information analysis solution for strategic and 'ad hoc' decision making. Solving the 'what, when, where and how' for delivering key information in your web browser without the 'what, when, where and how' of data access, inTuator is the smart solution for business users.

## What makes inTuator different?

inTuator's new and vibrant approach to information analysis is:

.... affordable ...with no hidden costs, your inTuator package is one server, one price - no user or tier base. A comprehensive package of training, implementation and support services second to none at an unbeatable price point!

.... works with MedSeries4 application files ... data mapping unlocks the information in your database. Need some changes at a later date...? That's also included in the inTuator package!

.... everything you'd expect and more ... slice & dice, pivot, expand, drill, format ... and more ... email, print, export, refresh and link to other information, tables and charts!

.... uniquely practical, easy and fun to use ... inSets (mapping), inStores (data extraction), and inTuates (table and chart views) are terms and concepts that will soon be familiar to you.

.... not just a product and a range of services ...! It's the inTuator "total satisfaction experience" ... from implementation to training ... inSet modification ... discussion forum ... on request inTuator Health Check ... expert advice ... and more.

.... 'inTuative' and easy to use ... HELP that's innovative and interesting ... you may not *need* to use it, ... but you'll want to!

inTuator ... business information for informed decision making --- management and others across the organization can benefit - accounts, customer service, marketing, clinicians and other medical staff.

Let inTuator give your healthcare facility that 'inTuative' edge.

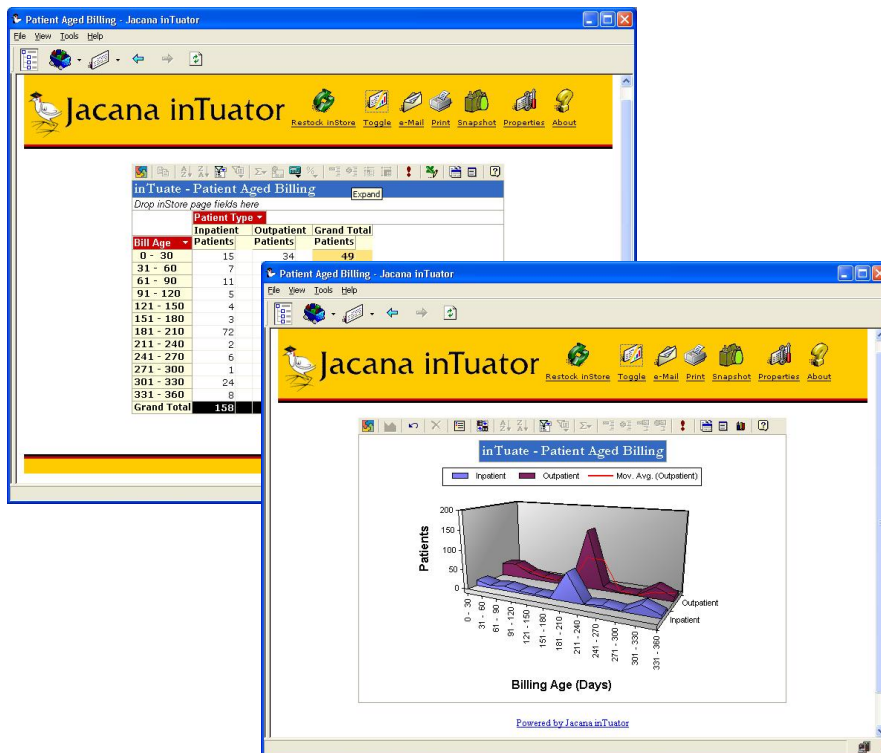

## The inTuator Sensation

- Dynamic, interactive information tables and charts at a fraction of the cost of other solutions
- Intuitive and powerful managed information analysis ... fast learning curve
- Installed in minutes ... No lengthy setup ... Immediately productive ...
- No need to create and manage overheads of a data warehouse, redundant data replication, or lengthy refreshing of separate databases
- No unexpected implementation costs or programming worries
- Leverages Momentum's and other widely available technologies... MS Office integration
- Functionality you need ... Lean and mean ... No fancy overheads

**Intuate** v.t.,. *To intuitively put together / assemble / collate business information in various presentation formats*

## Dynamic, interactive tables & charts

## Works with MS4!

inTuator empowers information analysis to enhance patient care and improve profitability.

inTuator can access and present your information from all areas of your healthcare implementation including:

- Patient History and Accounting – admission, central business office, receivables ...
- Census – statistics, trends, marketing demographics ...
- Clinical – ad-hoc analysis from lab, case mix, order communications, medical records, care planning and other clinically derived data.
- Financial – general ledger, accounts payable, material management, payroll ...

Use inTuator to make that strategic difference in analyzing and presenting clinical and financial healthcare information for the clinician, business office, executive, and medical staff.

## Requirements

- Office 2000 / XP License available
